**REQUEST FOR RECONSIDERATION**

Assistant Commissioner of Patents  
Washington, D.C. 20231

Sir:

The following is in response to an Office Action, which as made final, that was mailed on 5/21/2002.

RECEIVED  
AUG 20 2002  
TECHNOLOGY CENTER 2809

**REMARKS**

Claims 32-42 are pending and stand rejected. Reexamination and reconsideration of the subject application in view of the foregoing remarks are respectfully requested.

The subject Office Action rejected claims 32-42 under 35 U.S.C. 102(b) as being anticipated by Teagno et al. (reference was made to Figures 1-4). In the "Response to Arguments" section the Examiner stated that Applicant does not provide any specifics as to which elements are not shown.

In response to the rejections of claims 32-36, the Applicant directs the Examiner's attention to a Figure 5, which shows a trough-shaped clamping part having lamp clamp sides for pressing and securing an electrode. As best understood, that trough-shaped clamping part is not shown in or obvious from Teagno et al. Thus, those claims are believed to be allowable.
